

Assignment 2

For my ontology I decided to base it on the television show *Charmed* which aired between, 1998-2006. At first, I stated to do the ontology on the general world and beings of the Charmed universe, but I realized I was biting off more than I could chew, the world of Charmed is incredibly vast and was impossibly large for this assignment so I had to think carefully of an aspect of the show that I could try and do for this ontology project. At first, I thought about just doing the various species depicted in the show but I decided against that.

I finally decided to limit the ontology to the Charmed Ones and their immediate family, which includes their parents, significant romantic partners, and their children, the ontology also looks specifically a bit at the different species the Charmed Ones and their family were on the show. I found this to be still a lot of work but not an unsurmountable amount the part that I found took the most time for the annotations for some of the characters in the show.
